The quintet has already provided clues about their new musical direction, focused on searching for a genuine sound that is greatly influenced by cinema. 2023 is the year of the return of The Limboos, or perhaps we should say of the new beginning of a band in constant evolution and in a constant quest.
The Limboos came out of nowhere in 2013 with the sole intention of delving into the sounds and rhythms of New Orleans and the wilder tradition of vintage R&B. They quickly became the revelation of the stage with a formula that was baptised as "exotic rhythm and blues". This hodgepodge of Caribbean rhythms and the music of the 50's culminated in their first album, *Space mambo* (2014). From then on, they became regulars in every corner of the Spanish peninsula, gaining more and more followers of their music. This constant touring also took them across borders to France, Belgium, Netherlands, Germany, Switzerland, Portugal and Italy.
